3. Claims are 1-24 allowed over the prior art of record.
4. The following is an examiner's statement of reasons for allowance: for example to claim 1, the prior art of record does not teach or fairly suggest a representation of macro for an integrated circuit layout comprising the following components a plurality of diffusion regions, a metal layer (predefined and fixed metal layer), at least one interconnection layer (additional metal layer) above the metal layer. Specifically recitation of the at least one interconnection layer above

said metal layer, wherein (i) said diffusion regions and said metal layer form a plurality of sub-circuit cells of a first module, (ii) said at least one interconnection layer connects at least two of said sub-circuit cells in accordance with said macro to complete said first module having a predefined functionality, and (iii) said sub-circuit cells include at least one reusable circuit cell configured with a plurality of signal terminals such that when said predefined functionality of said module is not used in a custom design, said reusable circuit cell is connected to at least one second module through said terminals by said at least one interconnection layer in said custom design.
